Description

RedSleeve is an EL derived rpm based distribution, like CentOS. It is currently the only EL derived distribution for ARM. It doesn't ship with kernels due - instead users are advised to use whatever kernel the device vendor provides and maintains. Kernels provided by other distributions can also be used.

Installation

Install using Ignition

RedSleeve can be installed using the [Ignition](#) installer. [Flash Ignition to an SD card](#), then use Ignition to download and install RedSleeve automatically.
